

Connect with Confidence. Work More Efficiently.

NACM API Integration Options for Clients

Our API integration options help approved clients and vendors connect their software with NACM. Instead of entering the same information in multiple places, an API connection can move approved data between systems automatically.

WHAT AN API INTEGRATION CAN HELP WITH

- 

Retrieve information from your NACM dashboard.
 Access account, credit, and monitoring data automatically in real time.
- 

Pull NTCR and other reports into your system.
 Retrieve NTCRs and other reports for use in your workflows and applications.
- 

Reduce manual data entry and duplicate work.
 Keep information updated between systems and limit repetitive manual tasks.

WHY CLIENTS USE IT

- 

Save Time
 Reduce repetitive manual entry.
- 

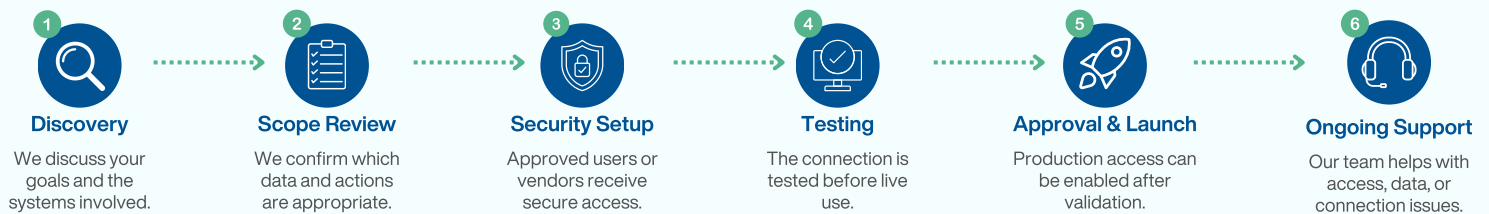

Improve Accuracy
 Limit copy-and-paste errors.
- 

Connect Existing Software
 Link software already used by your team.
- 

Automate Routine Workflows
 Support updates, requests, reports, or status checks.
- 

Support Vendor-Managed Processes
 Allow approved vendors to help support the connection.

HOW THE PROCESS WORKS

SECURITY & ONBOARDING

- 

Permission-Based Access
 Access is controlled and approved based on role and use case.
- 

Testing Before Production
 Live access is not provided until setup and testing are complete.
- 

Guided Support
 We help coordinate setup, testing, launch, and follow-up support.

WHAT WE NEED FROM YOU

- System name
- Business goal
- Data to send or receive
- Builder: internal team or vendor
- Technical contact
- Target timeline

 **Next Step:**
 Contact our team to schedule a short integration review.
